Key Stage 3 Home Learning

Our home learning programme is tailored to the needs of each individual student and is an important part of your child's education.

It provides opportunities to build on and develop ideas from the classroom and encourages students to explore, research, and learn independently.

Show My Homework

This is a personalised website that shows students what home learning they have been set and when it is due in to their teacher. Students can access this website from any device and even access it on the go. Parents also have their own login to the website so they can support their child's learning by seeing what has been set for them each week.

All students and parents have a login in for this website. If you lose / forget your password or username, please see either Miss Cochrane or Miss LeMottee in order for it to be reset.

The Learning Zone

The Unity Learning Zone is a quiet area of the school where students can complete their home learning.

The Learning Zone is located in the school library and is open every evening after school between 3.10pm - 4.10pm for students to use.

There is always a member of staff present who will be able to direct students to resources which they may need to assist them with their home learning.

You do not need to book a place in the Learning Zone, students can just turn up when they need to use it.

Academic Clubs After School

Unity college offers a wide variety of clubs to reinforce academic learning. These are to ensure all students can reach their full potential. The table below shows all the clubs we offer. However, each subject may offer additional clubs throughout the year. All students will be notified of these.
